EXPERIENCE

Squarespace – Senior Product Designer
2022 - Present, New York
Took on large, ambiguous platform bets from zero to launch. Owned Multilingual, the most used new feature on Squarespace, now translating millions of websites; proved demand with a Weglot extension before building native. Rebuilt Forms, the oldest unchanged part of the platform, for all 5M+ subscriptions: localized, accessible and skinnable. Designed the cookie banner and a legal assistant for sellers from scratch. Rebuilt the pricing plans flow, increasing subscriptions. Shaped the Japan launch, the first international launch in 8 years, and wrote the localization and accessibility guidelines.

N26 – Senior Product Designer
June 2021 - 2022, New York
Led design for the US money movement launch, shipping Cash Deposit and Remote Check Deposit and shaping go-to-market with product managers. Set design direction for two product designers in Berlin and Barcelona.

Remesh – Senior Product Designer
June 2018 - June 2021, New York
Designed the core web app and analysis features from scratch; audience engagement rose 35% after the redesign. Started and led the accessibility and localization initiative and helped build the design system. Led the rebrand in my first 6 months, raising the appeal score from 4/10 to 8.5/10. Led the partnership with the UN's Yemen and Libya peace missions.

Quill.org – Product Designer
January 2017 - June 2018, New York
Took 2 products from rough idea to use by 60k teachers. Quill Lessons reached 18k sessions per day.
